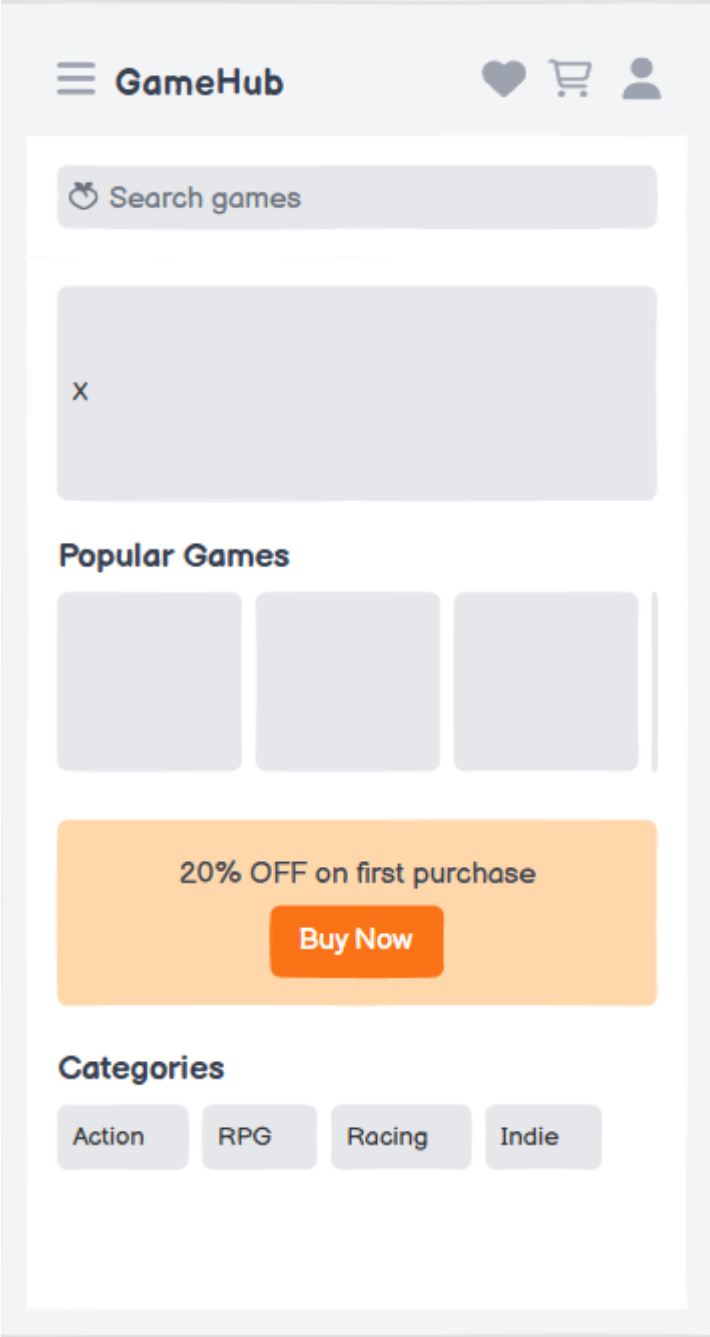
Roll No: 240701395

Create storyboards to represent the user flow for your application using Balsamiq

---

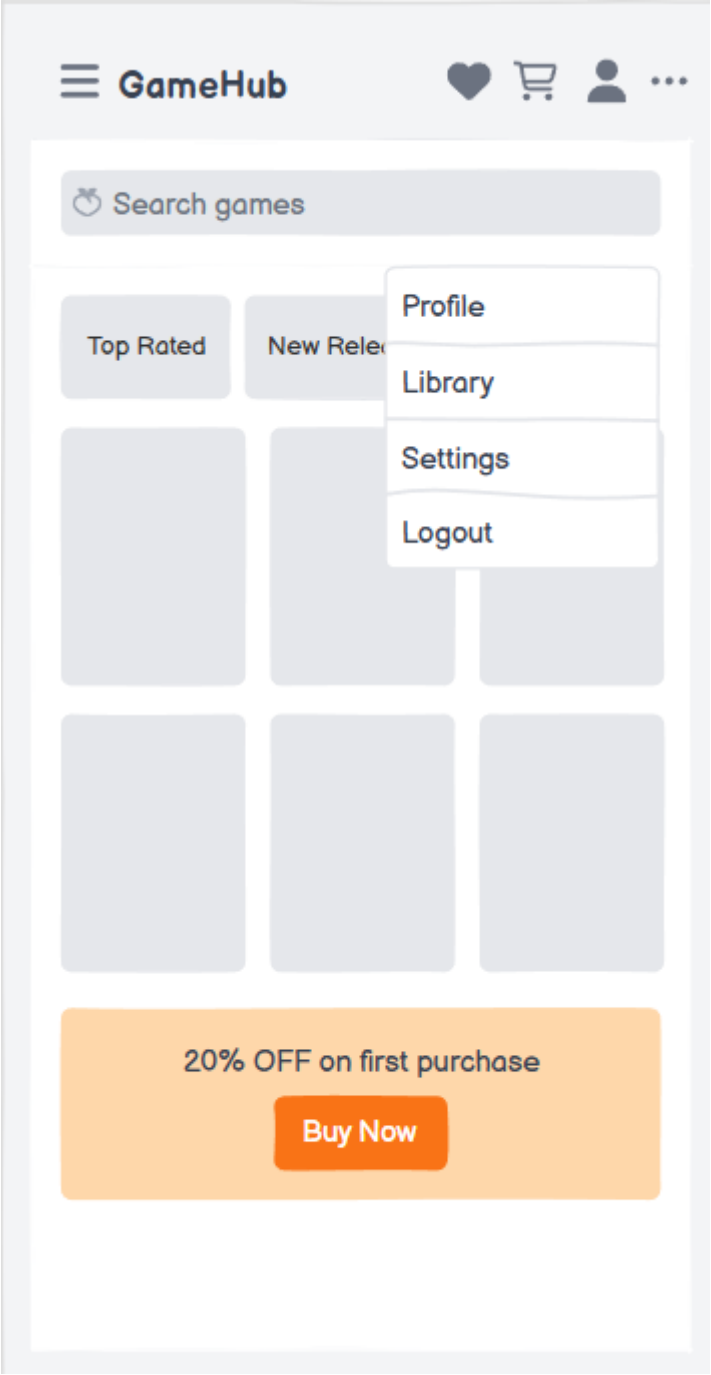
Home Screen

The Home Screen is the main entry point of the GameHub application. It includes a navigation bar with icons, a search bar, featured game section, popular games list, discount banner, and category filters like Action, RPG, Racing, and Indie. This screen helps users quickly explore games and offers.



Store Screen

This screen displays a collection of games in a grid format. It includes filters such as Top Rated, New Releases, and Free to Play. A profile dropdown menu is available with options like Profile, Library, Settings, and Logout. This helps users manage their account and browse games easily.



Subscription

This screen focuses on user engagement by displaying points, achievements, badges, and rewards. Users can complete tasks such as playing games or winning matches to earn rewards. A claim reward option is also available.

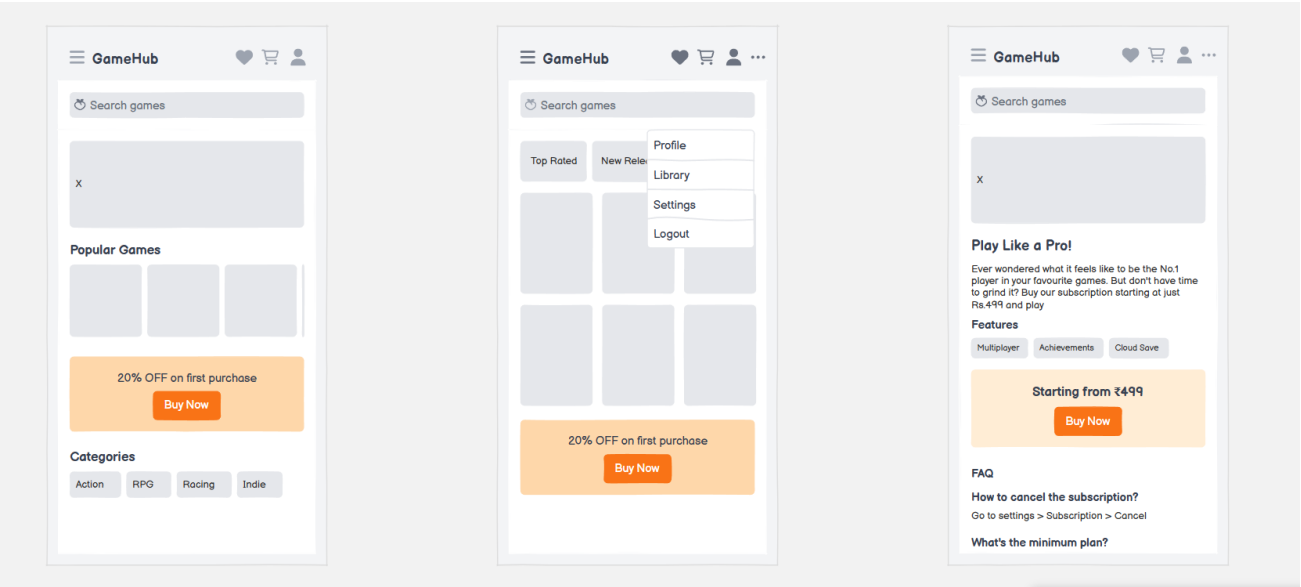
Conclusion


The storyboard presents a simple and user-friendly design for a game marketplace application. It focuses on easy navigation, clean layout, and interactive features like rewards to improve user experience.
