EXPERIMENT 3

Name: Pranav Shanmugam
Roll No: 240701395

1. COMMAND LINE INTERFACE

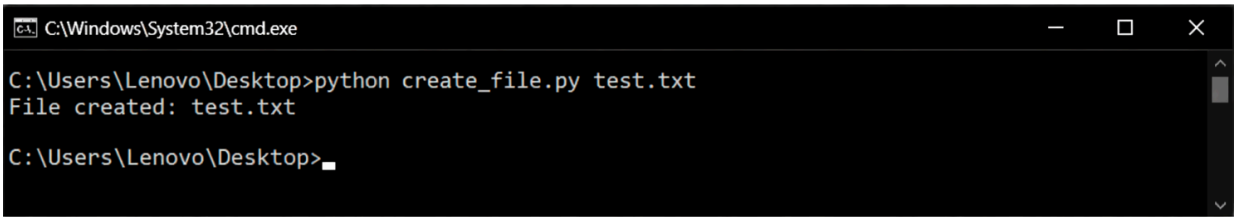
PYTHON CODE:

```
import os
import sys

def create_file(name):
    f = open(name, "w")
    f.write("New file created")
    f.close()
    print("File created:", name)

if len(sys.argv) != 2:
    print("Enter file name")
else:
    create_file(sys.argv[1])
```

OUTPUT:



2. GRAPHICAL USER INTERFACE

PYTHON CODE:

```
import tkinter as tk
import os

def delete_file():
    name = entry.get()
    if os.path.exists(name):
        os.remove(name)
        label.config(text="Deleted: " + name)
    else:
        label.config(text="File not found")

root = tk.Tk()
root.title("File Deleter")

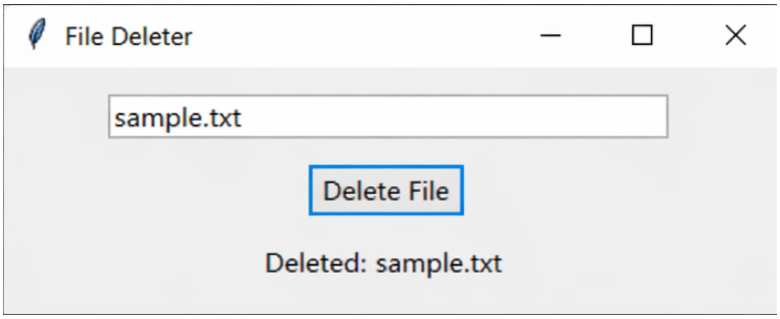
entry = tk.Entry(root, width=30)
entry.pack()

btn = tk.Button(root, text="Delete File", command=delete_file)
btn.pack()

label = tk.Label(root, text="")
label.pack()

root.mainloop()
```

OUTPUT:



3. VOICE USER INTERFACE

PYTHON CODE:

```
import speech_recognition as sr
import os
import shutil

def move_file(command):
    words = command.lower().split()

    if "move" in words and "to" in words:
        file_name = words[1]
        dest = words[-1]

        if os.path.exists(file_name):
            shutil.move(file_name, dest)
            print("File moved")
        else:
            print("File not found")
    else:
        print("Say: move file.txt to folder")

def listen():
    r = sr.Recognizer()
    with sr.Microphone() as source:
        print("Listening...")
        audio = r.listen(source)

        try:
            cmd = r.recognize_google(audio)
            print("Command:", cmd)
            move_file(cmd)
        except:
            print("Error")

listen()
```
